

## Data Center Deployment, Commissioning & Secure Infrastructure Integration

### COMPANY OVERVIEW

SNTR LLC is a founder-led, service-disabled veteran-owned (SDVOSB) information technology infrastructure and services firm specializing in data center deployment, commissioning, and secure systems integration for multi-site, mission-critical environments. Leadership brings direct hyperscale data center and U.S. military communications experience to federal customers that demand disciplined execution, secure deployment, and senior hands-on involvement across physical and IT systems.

### CORE COMPETENCIES

- **24/7 Infrastructure Operations & Cyber Monitoring.** Continuous management and security monitoring of IT infrastructure across distributed sites, including out-of-band management and incident response.
- **Data Center Deployment & Commissioning.** Greenfield and expansion buildouts: site readiness, rack-level install, power/cooling/network bring-up, installation validation, and operational handoff.
- **Secure Network & Systems Integration.** Firewalls, IDS, network authentication, VPN appliances, PKI automation, software signing, and cross-domain platforms for classified and mission networks.
- **Technical Program & Deployment Planning.** Capacity planning, migration sequencing, rack-move workflows, and site-readiness planning across power, cooling, network, server, and application layers.
- **Infrastructure Documentation & Handoff.** As-built documentation, compliance support, metrics and standards development, and structured turnover packages that keep systems auditable.
- **Secure Decommissioning & Data Sanitization.** End-of-life hardware removal, NIST-aligned data erasure, and network reconfiguration for uptime-sensitive, security-conscious environments.

### DIFFERENTIATORS

- **Defense Communications Background.** Founder served in U.S. Army Signal Corps / DISA European Theater operations supporting 200+ joint communications facilities and SATCOM terminals, directly relevant to DISA, NETCOM, and DoW network missions.
- **Cleared-Environment Engineering.** Hands-on delivery in classified and mission networks: PKI automation, cross-domain virtualization, IDS, and security baselines, not commercial IT alone.
- **Single Accountable Partner.** Bridges electrical/cabling install, rack deployment, network configuration, and systems provisioning under one founder-led team. Most firms split this work between a trade contractor and an IT integrator.

### KEY PERSONNEL EXPERIENCE

SNTR LLC is a newly formed company. The experience below reflects the documented, hands-on work of the firm's key personnel, performed in prior roles at other employers. It is presented as principal experience, not company past performance.

**Senior Systems Administrator / Infrastructure Lead. Active TS/SCI.** Cut system downtime 83% and accelerated security patching 50% across DoW classified enclaves; 20+ years in Active Directory, DISA STIG validation, and cross-domain operations.

**Information Security / RMF Engineer (ISSO). Active TS/SCI.** 20+ years maintaining DoW Authorizations to Operate using eMASS and XACTA under NIST 800-53 and 800-37; improved operational continuity 25% through RMF and STIG remediation.

**Cybersecurity Operations Director. Active TS/SCI.** Former Army Chief Warrant Officer who directed enterprise cybersecurity and incident response at 99.9% system availability across multi-country mission networks.

**Data Center Operations Lead.** 15+ years in hyperscale data center operations; drove a 47% year-over-year drop in high-impact incidents and raised fleet uptime from four-nines to five-nines, including immersion and direct liquid cooling for GPU clusters.

**Data Center Hardware Architect.** 20+ years in server and data center mechanical design; holder of 40+ U.S. patents and an Open Compute contributor, delivering \$10M+ in infrastructure capital savings.

**Team bench:** Key personnel include four individuals holding active Top Secret/SCI clearances, with credentials spanning CISSP, CompTIA Security+, RMF and eMASS, and 40+ U.S. patents, and experience across DoW classified environments and hyperscale data center operations.

### COMPANY DATA

**Company:** SNTR LLC

**UEI:** [NE6KH5BJ3SM6](#)

**CAGE:** 15MH9

**Established:** 2025

**Employees:** 10

**Service Area:** Nationwide

**Project Range:** \$50K to \$5M

### SBA CERTIFICATIONS

SDVOSB: Service-Disabled Veteran-Owned Small Business  
VOSB: Veteran-Owned Small Business

### CLEARANCES & CREDENTIALS

- Active Top Secret/SCI clearances (personnel)
- CISSP, CompTIA Security+, A+, Network+
- RMF, eMASS, XACTA (NIST 800-53 / 800-37)
- PMP, Microsoft Azure, Cisco CCNA

### NAICS CODES

**541513** Computer Facilities Management (Primary)  
**541512** Computer Systems Design Services  
**541519** Other Computer Related Services  
**541330** Engineering Services  
**541611** Admin & General Mgmt Consulting  
**238210** Electrical / Wiring Installation

### TARGET AGENCIES

- DISA
- NETCOM
- MICC
- USACE
- NAVFAC
- AFCEC / AFIMSC
- GSA
- DOE / NNSA
- DHS / CISA
